Replaced revision:2 (Printed on: 15/02/2017)

Safety Data Sheet According to Annex II to REACH - Regulation (EU) 2020/878 and to Annex II to UK REACH			
SECTION 1. Identification of the subs	stance/mixture and of	the company/underta	king
1.1. Product identifier Code: Product name	455172 SAPONIL		
1.2. Relevant identified uses of the substance or m	ixture and uses advised agair		
Identified Uses Mural finish	Industrial	Professional	Consumer
	-	v	✓
Uses Advised Against			
All uses other than painting in construction.			
1.3. Details of the supplier of the safety data sheet Name Full address District and Country	CROMOLOGY ITALIA S.P.A. Via IV Novembre, 4 55016 Porcari (LU) Italia Tel. 199.11.99.55 Fax 199.11.99.77		
e-mail address of the competent person			
responsible for the Safety Data Sheet	info-sds@cromology.it		
1.4. Emergency telephone number For urgent inquiries refer to	Contact your local poison co For more information: Cromo from Monday to Friday 9:30-7	ology Italia SpA Phone +39 05	832424
SECTION 2. Hazards identification			
2.1. Classification of the substance or mixture The product is not classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP). However, since the product contains hazardous substances in concentrations such as to be declared in section no. 3, it requires a safety data sheet with appropriate information, compliant to (EU) Regulation 2020/878.			
Hazard classification and indication:			
2.2. Label elements			
Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendme	ents and supplements.	
Hazard pictograms:			

		CROMOLOGY ITALIA S.P.A.	Revision nr. 3

SECTION 4. First ai	d measures		

4.1. Description of first aid measures

Revision nr. 3

SAPONIL

Dated 14/05/2024

Printed on 14/05/2024

Page n. 3/13

Replaced revision:2 (Printed on: 15/02/2017)

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Wash immediately with plenty of water. If irritation persists, get medical advice/attention. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. In the event of breathing difficulties, get medical advice/attention immediately.

INGESTION: Get medical advice/attention. Induce vomiting only if indicated by the doctor. Never give anything by mouth to an unconscious person, unless authorised by a doctor.

Rescuer protection

Information not available

4.2. Most important symptoms and effects, both acute and delayed

Information not available

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

Means to have available in the workplace for specific and immediate treatment

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Revision nr. 3

Dated 14/05/2024

SAPONIL

Printed on 14/05/2024

Page n. 4/13

Replaced revision:2 (Printed on: 15/02/2017)

Use breathing equipment if fumes or powders are released into the air. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Wash hands after use.

7.2. Conditions for safe storage, including any incompatibilities

Keep the product in clearly labelled containers. Store the containers sealed, in a well ventilated place, away from direct sunlight.

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

Information not available

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

HAND PROTECTION

Protect hands with category III work gloves.

The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, permeability time. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap

Revision nr. 3

Dated 14/05/2024

SAPONIL

Page n. 5/13

Replaced revision:2 (Printed on: 15/02/2017)

and water after removing protective clothing.

EYE PROTECTION Wear airtight protective goggles (see standard EN ISO 16321).

RESPIRATORY PROTECTION

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type B filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387).

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

Properties Appearance Colour	Value liquid colourless	Information Temperature: 20 °C
Odour	typical	
Melting point / freezing point Initial boiling point Flammability Lower explosive limit	< 5 °C 100 °C not flammable not applicable	Method:Derived Method:Derived Method:Derived
Upper explosive limit	not applicable	
Flash point	> 60 °C	
Auto-ignition temperature	not applicable

9.2.1. Information with regard to phys	ical hazard classes	i
Information not available		
9.2.2. Other safety characteristics		
VOC (Directive 2004/42/EC) :	100,00	
SECTION 10. Stability and	1 reactivity	
10.1. Reactivity		
There are no particular risks of reaction	with other substances in normal conditions of use.	
10.2. Chemical stability		
The product is stable in normal conditio	ns of use and storage.	
10.3. Possibility of hazardous reactions		
No hazardous reactions are foreseeable in normal conditions of use and storage.		
10.4. Conditions to avoid		
None in particular. However the usual p	recautions used for chemical products should be respected.	
10.5. Incompatible materials		
Information not available		
10.6. Hazardous decomposition proc	lucts	
Information not available		
SECTION 11. Toxicologic	al information	
In the absence of experimental data fo	r the product itself, health hazards are evaluated according to the pro	perties of the substances it contains, using

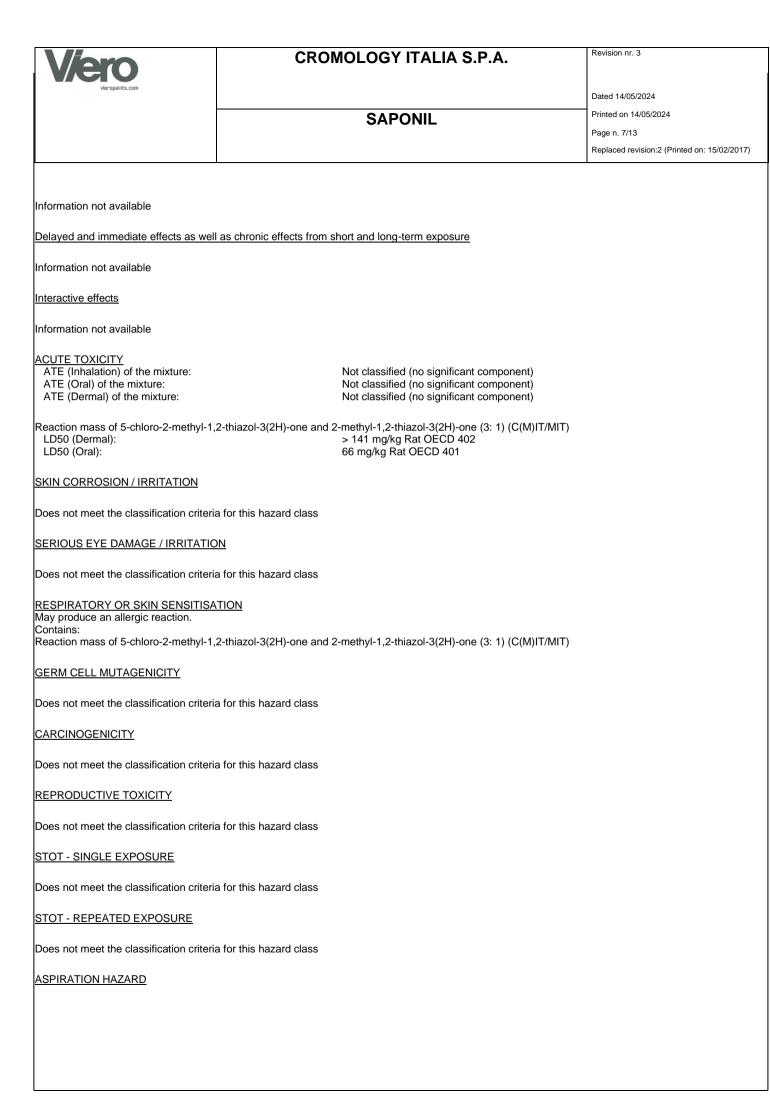

the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Revision nr. 3

Replaced revision:2 (Printed on: 15/02/2017)

Does not meet the classification criteria for this hazard class

11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

SECTION 12. Ecological information

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

12.1. Toxicity

Reaction mass of 5-chloro-2-methyl-1,2- thiazol-3(2H)-one and 2-methyl-1,2-thiazol- 3(2H)-one (3: 1) (C(M)IT/MIT) LC50 - for Fish	0,22 mg/l/96h Oncorhynchus mykiss	
EC50 - for Crustacea	0,0052 mg/l/48h Dafnia magna	
EC50 - for Algae / Aquatic Plants	0,048 mg/l/72h Pseudokirchnereilla subcapitata	
Chronic NOEC for Fish	0,098 mg/l Onchorthyncus Mykiss (OECD 210)	
Chronic NOEC for Crustacea	0,004 mg/l Daphina magna (OECD 211)	
Chronic NOEC for Algae / Aquatic Plants	0,00064 mg/l Skeletonema costantium (ISO 10263, RAC)	
12.2. Persistence and degradability		
Reaction mass of 5-chloro-2-methyl-1,2- thiazol-3(2H)-one and 2-methyl-1,2-thiazol- 3(2H)-one (3: 1) (C(M)IT/MIT) Rapidly degradable 12.3. Bioaccumulative potential Reaction mass of 5-chloro-2-methyl-1,2- thiazol-3(2H)-one and 2-methyl-1,2-thiazol- 3(2H)-one (3: 1) (C(M)IT/MIT) BCF	3,6 Calculated	
12.4. Mobility in soil		
Information not available		
12.5. Results of PBT and vPvB assessment		
On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.		

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Neat product residues should be considered special non-hazardous waste.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

SECTION 14. Transport information

The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

14.1. UN number or ID number

not applicable

14.2. UN proper shipping name

VOC (Directive 2004/42/EC) :

Decorative effect coatings.

Questo prodotto contiene prodotti biocidi.

15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

SECTION 16. Other information

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Acute Tox. 2	Acute toxicity, category 2
Acute Tox. 3	Acute toxicity, category 3
Skin Corr. 1C	Skin corrosion, category 1C
Skin Corr. 1	Skin corrosion, category 1
Eye Dam. 1	Serious eye damage, category 1
Eye Irrit. 2	Eye irritation, category 2
Skin Irrit. 2	Skin irritation, category 2
Skin Sens. 1A	Skin sensitization, category 1A
Aquatic Acute 1	Hazardous to the aquatic environment, acute toxicity, category 1
Aquatic Chronic 1	Hazardous to the aquatic environment, chronic toxicity, category 1
H310	Fatal in contact with skin.
H330	Fatal if inhaled.
H301	Toxic if swallowed.
H314	Causes severe skin burns and eye damage.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.
EUH071	Corrosive to the respiratory tract.
EUH210	Safety data sheet available on request.

LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road

thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11. Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.

Changes to previous review:
